

# Fantasy Subtraction

Once upon a time, Sidney the  
Subtraction Wizard decided to  
give Tilly the Tooth Fairy a little  
surprise...

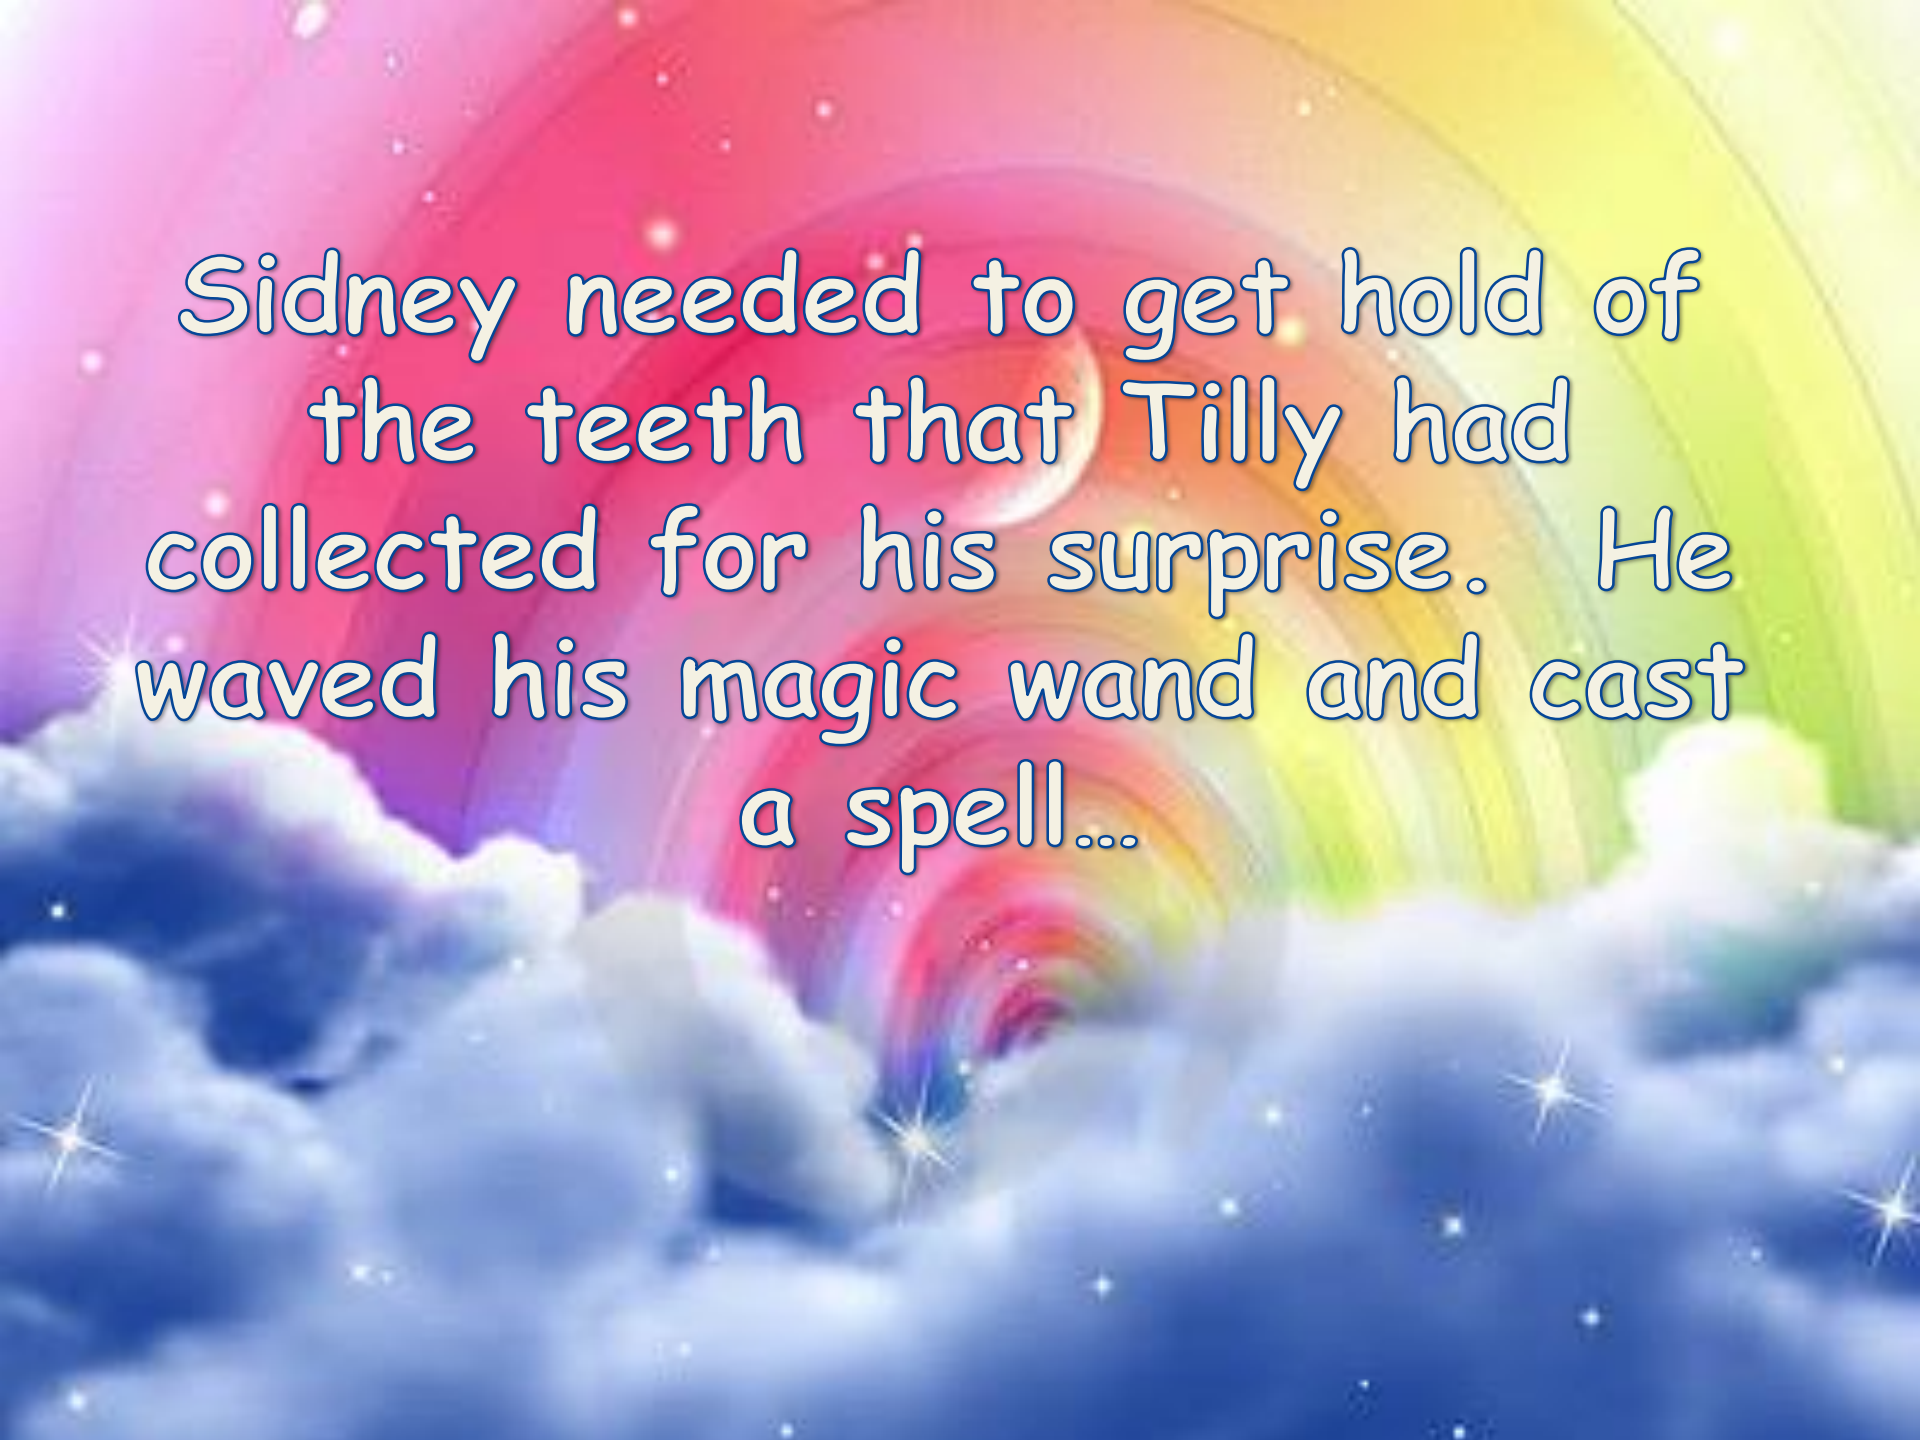

Tilly had been very busy.  
She had collected ten  
beautiful white teeth.

She stored them in her house, then went out to play with the tidy up fairies at the end of the Rainbow.

Sidney needed to get hold of  
the teeth that Tilly had  
collected for his surprise. He  
waved his magic wand and cast  
a spell...

All the little teeth  
appeared!  
Can you help Sidney  
count them?

That's right! There were 10  
little teeth.

Sidney waved his wand  
and took 2 away...

Can you help Sidney  
count how many were  
left?

That 's right, there were 8  
teeth left!

A vibrant, multi-layered rainbow tunnel with a crescent moon and stars. The background is a deep blue sky filled with white, fluffy clouds and numerous bright, multi-pointed stars. A large, multi-layered rainbow arches across the sky, creating a tunnel effect that recedes into the distance. A small, white crescent moon is visible in the upper right portion of the rainbow tunnel. The overall scene is bright and colorful, with a magical, dreamlike atmosphere.
$$10 - 2 = 8$$

Sidney waved his wand  
and took 3 away...

Can you help Sidney  
count how many were  
left?

That 's right, there were 5  
teeth left!

A vibrant, multi-layered rainbow tunnel with a crescent moon and stars. The background is a deep blue sky with white, fluffy clouds and several bright, multi-pointed stars. The rainbow consists of many concentric, overlapping arches that create a tunnel effect, leading the eye towards the center. The colors transition from purple and blue on the left to red, orange, yellow, and green on the right. A small, glowing crescent moon is positioned in the center of the rainbow tunnel. The overall scene is bright and colorful, with a dreamlike atmosphere.
$$8 - 3 = 5$$

Sidney waved his wand  
and took 4 away...

Can you help Sidney  
count how many were  
left?

That 's right, there was 1  
tooth left!

A vibrant, multi-layered rainbow tunnel with a crescent moon and stars. The background is a deep blue sky filled with white, fluffy clouds and numerous bright, multi-pointed stars. A large, multi-layered rainbow arches across the sky, creating a tunnel effect that recedes into the distance. A crescent moon is visible in the upper right portion of the rainbow tunnel. The overall scene is bright and colorful, with a magical, dreamlike atmosphere.
$$5 - 4 = 1$$

Then Sidney waved his wand and took the last 1 away...

Can you help Sidney  
count how many were  
left?

That 's right, there were 0  
teeth left!

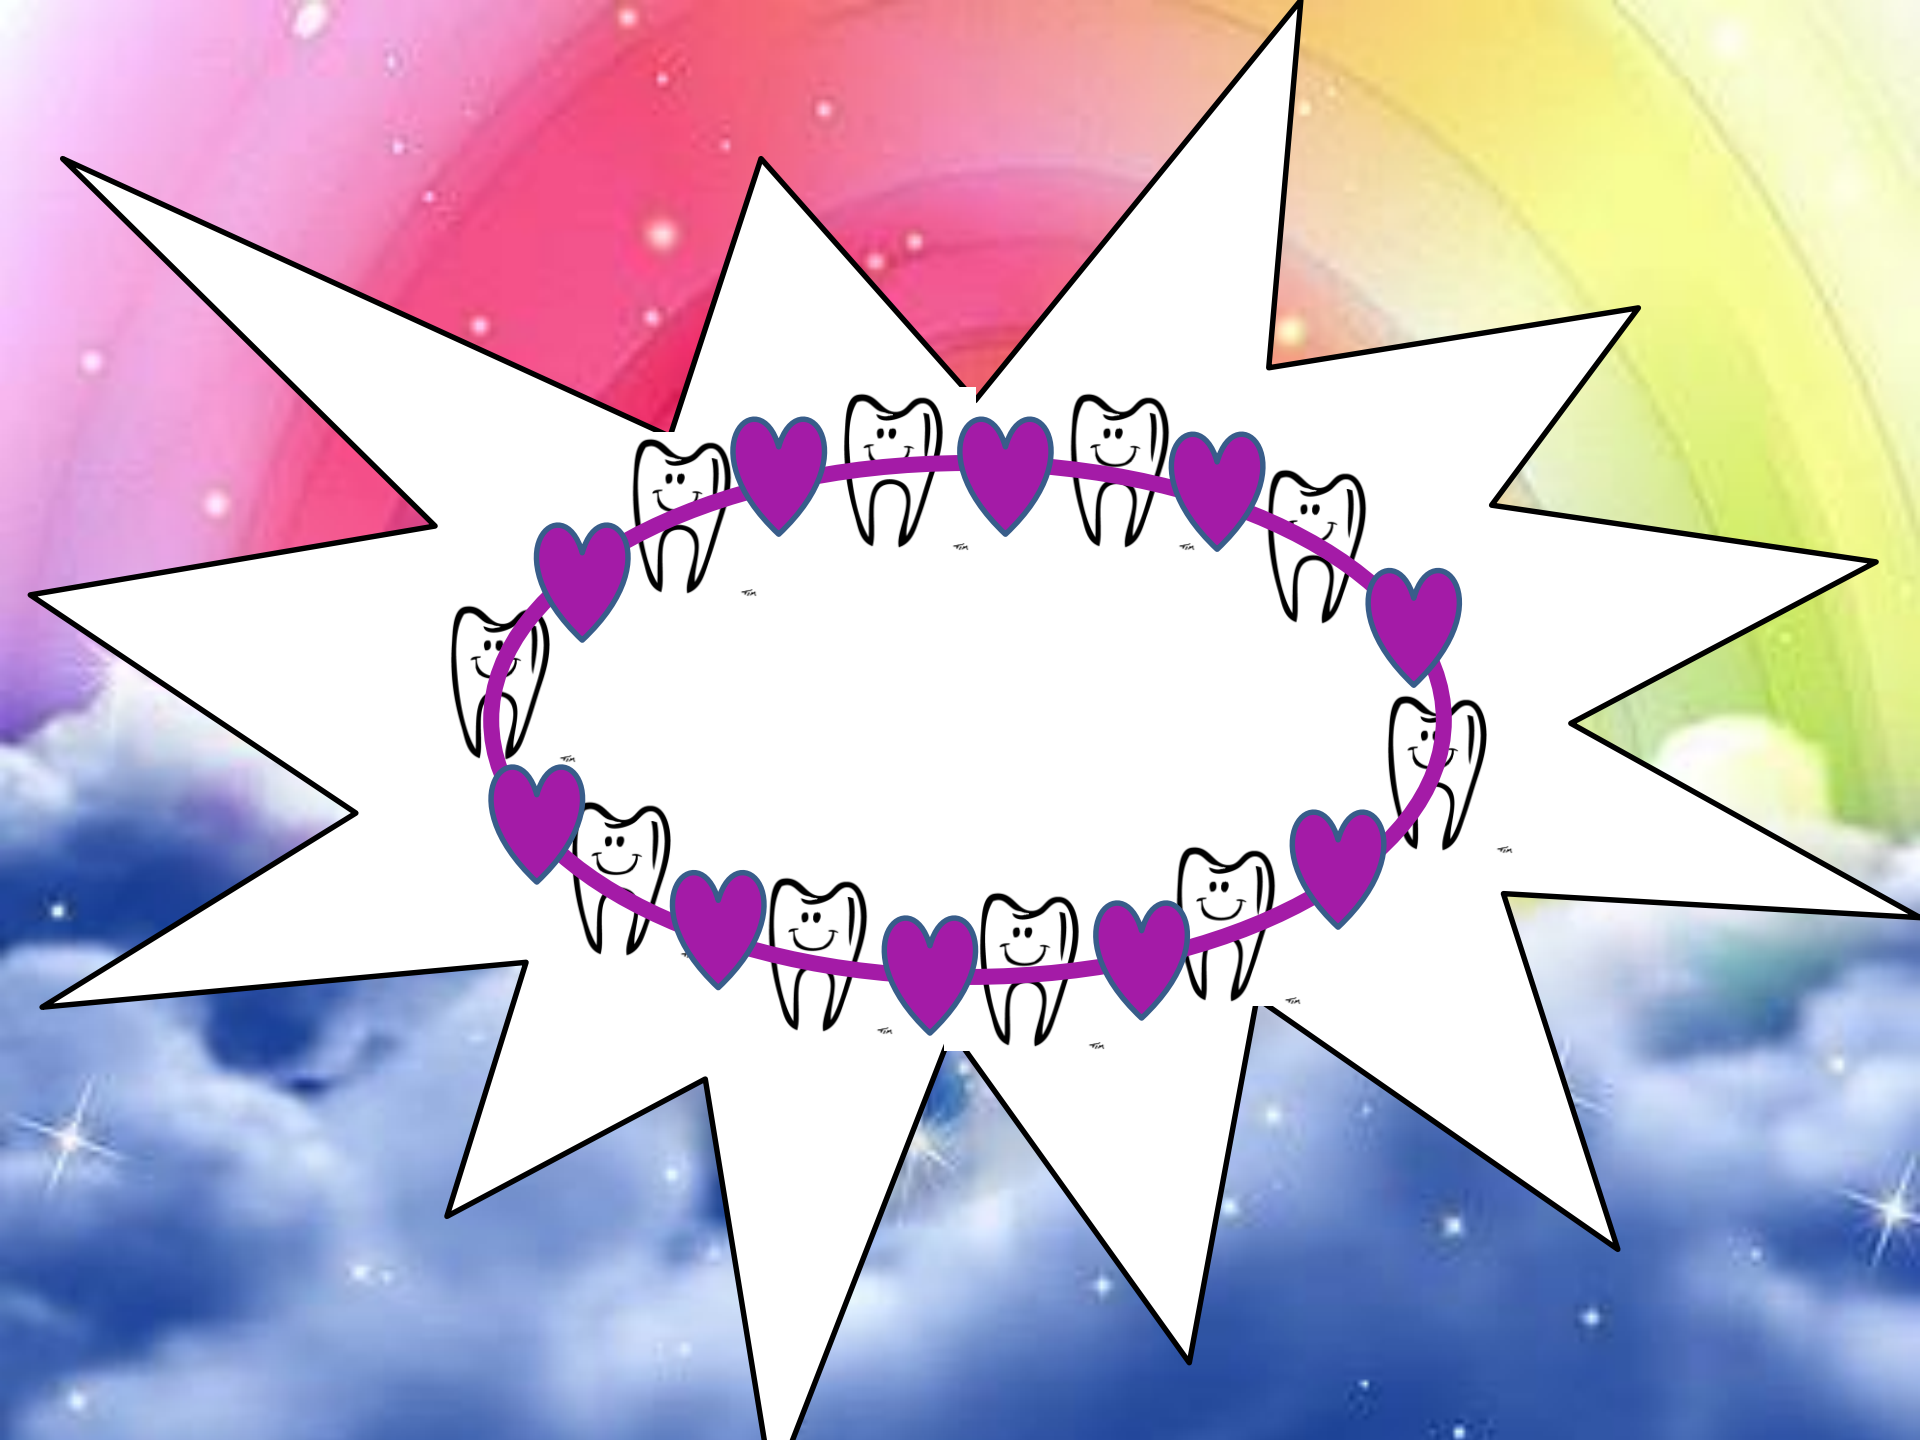

A vibrant, multi-layered rainbow tunnel with a crescent moon and stars. The background is a deep blue sky with white, fluffy clouds. The rainbow consists of many concentric, overlapping bands of color, creating a tunnel effect that recedes into the distance. A crescent moon is visible in the upper right portion of the rainbow. Numerous small, bright stars are scattered throughout the scene, adding to the magical atmosphere.
$$1 - 1 = 0$$

But where had all the  
teeth gone?

What had Sidney the  
Subtraction Wizard done  
with them?

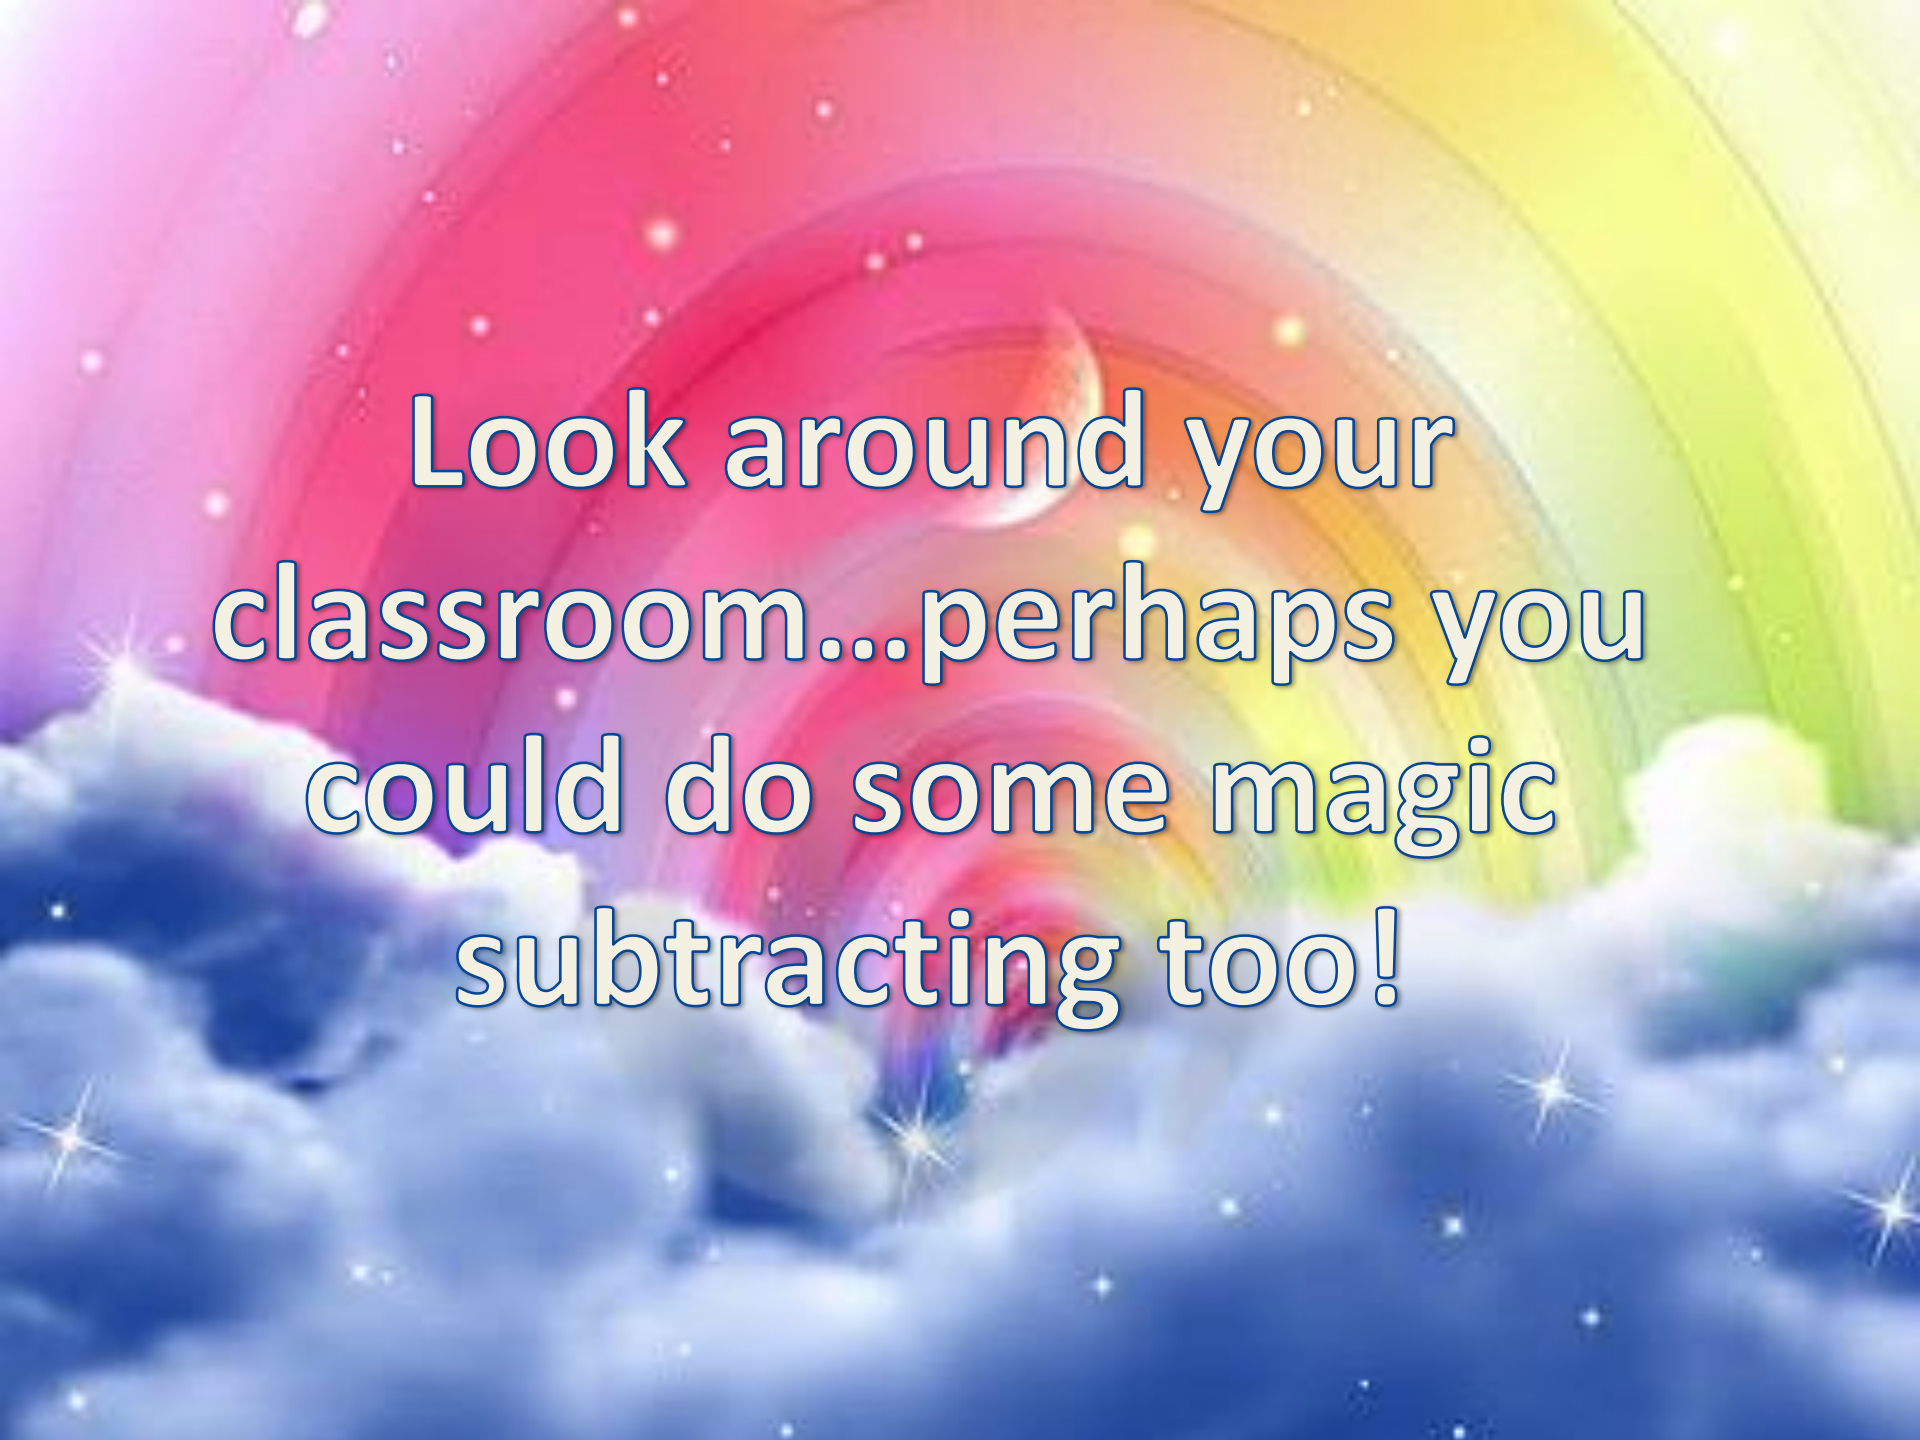

Sidney had made Tilly the  
Tooth Fairy the most  
beautiful bracelet out of  
the 10 little teeth!

**Thank you Sidney!**

And off they went to  
make Tilly's fairy cakes  
disappear too!

Look around your  
classroom...perhaps you  
could do some magic  
subtracting too!
